DETAILED ACTION

RE: Srivastav P.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,22-32,45-56,60-62,66-76,89-100,104-106,108, and 110, drawn to a method of inhibiting proliferation of a tumor, a method of treating a mammal having a tumor, and a method of eliciting an immune response comprising the administration of a heat shock protein-peptide complex and a pharmaceutical carrier, classified in class 424, subclass 277.1, for example.
- II. Claims 19-21,33-44,57-59,63-65,77-88,101-103,107, and 109 drawn to an isolated population of human stress protein-peptide complexes or a composition comprising human stress protein peptpide complexes and a pharmaceutical carrier, classified in class 503, subclass 402, for example.
- 2. The inventions are distinct, each from the other because of the following reasons:
- 3. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used for the production of a stress protein-peptide complex specific monoclonal antibody.

Application/Control Number: 09/992,613 Page 3

Art Unit: 1642

Searching the inventions of Groups I and II together would impose serious search burden. The inventions of Groups I and II have a separate status in the art as shown by their different classifications. Moreover, in the instant case, the search for the human stress protein-peptide complex and the method of inhibiting proliferation, treating cancer, or eliciting an immune response using the human stress protein-peptide complex are not coextensive. Group II encompasses molecules which are claimed in terms of amino acid sequence or structure, which are not required for the search of Group I. In contrast, the search for group I would require a text search for the method of inhibiting proliferation, treating a cancer, or eliciting an immune response in addition to a search for the human stress protein-peptide complex. Prior art which teaches a human stress protein-peptide complex would not necessarily be applicable to the method of using the human stress protein-peptide complex. Moreover, even if the human stress protein-peptide complex product were known, the method of using the human stress protein-peptide complex may be novel and unobvious in view of the preamble or active steps.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found

Art Unit: 1642

allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher H. Yaen whose telephone number is 571-272-0838. The examiner can normally be reached on Monday-Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Siew can be reached on 571-272-0787. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
